What Do They Say?

"I really want to modernize my business, if I am taught how to use the app"

"Oh, apps like mobile banking are so complicated"

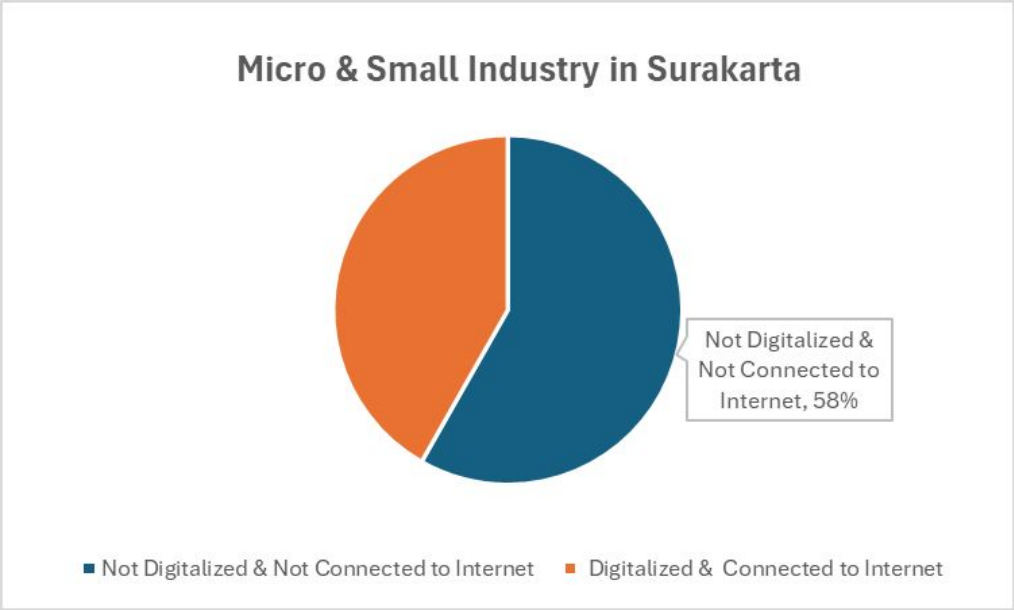
"So far, all I know is that we (MSI) are just gaining profit from tourists"

"Our plan, in certain circumstances we do need to borrow for capital, but we still don't know how to do it. Is it complicated?"

User Research, Kota Surakarta, 2025

+ ANOTHER OPPORTUNITY

1. **Financial Literacy Index** rise 1,5% and **Financial Inclusion Index** rise 7,3% YoY by 2025 (BPS & OJK) .
2. 6.352 out of 10.907 (58%) MSIs in surakarta **still not digitalized and not connected to the internet**



Badan Pusat Statistik Kota Surakarta, 2023

Solution Overview

Developing Livin' Merchant into a **comprehensive digital business ecosystem** by **integrating a simple website-based online store platform** for digital marketing expansion, **quick capital access through Modal Kilat**, optimization of raw material purchasing through a **recommendation system**, and a **digital assistant (ChatBot)** as a user support service.

Benefits:

- A comprehensive digital ecosystem in one application (Livin' Merchant).
- Fast and easy access to business capital.
- Personalized features for users.
- Inclusivity for MSIs to transform into the digital environment.

Service Blueprints

Physical Evidences	Livin' Merchant	Online store website	Modal Kita feature.	Smart recommendation and notifications	ChatBot
Customer Actions	Discover and create online shop website features	Buy raw materials for the business, get personalized notification	Need capital for the business and access Modal Kilat feature	Want to know about Livin' Merchant feature, ask the ChatBot	
Onstage contact actions	• Click on "Pemasaran & Penjualan" feature • Upload catalog	• Tap the notification • Check product recommendation • Checkout the raw materials	• Click on "Modal Kilat" feature • See the recommendation limit and tenor • Apply for the loan	• Click on ChatBot feature. • Ask a question • Get and read the answer	
Backstage contact actions	System saves the website configuration	Personalized algorithm services	• Credit score check • Supporting documents check • Fund disbursement	NLP engine identifies the question and gives the answer from the knowledge database	
Support processes	Website database and hosting	• Partner and promo database • Notification gateaway services	• Credit scoring engine • Banking system	• NLP platform • Knowledge database

Value Proposition

Value Propositions

Provide integrated digital banking platform for MSIs that prioritizes success of MSIs for sustainability of income with four key points: (1) no-cost online store; (2) access instant business capital anytime; (3) cut operational costs with smart recommendation; (4) 24/7 customer support with reliable chatbot assistant.

Why Mandiri Should Adapt:

- Leading the competition in the MSIs.
- Increasing customers loyalty
- Acquiring high-value data sources

Why Users Would Care

- Revenue growth with an online store.
- Fast and easy business capital access
- Integrated business management and time efficiency

Business Model Canvas
(Livin' Merchant Innovation)

MY DIGITAL ACADEMY

Key Partners

Surakarta City Government (for community support)
MSI communities and digital training programs

Raw material suppliers

Key Activities

Partnership with suppliers.

Marketing and user acquisition.

Platform enhancement from the UI/UX.

Key Resources

Brand Trust.

MSIs partner network.

Bank Mandiri digital infrastructure & customer base.

Value Propositions

Provide integrated digital banking platform for MSIs that prioritize success of MSIs for sustainability of income.

-Get a Professional Online Store Instantly, at No Cost and with Zero Hassle.

-Access Instant Business Capital Anytime, Disbursed within 24 Hours—Even on Holidays.

-Cut Operational Costs with Smart Notifications for Relevant Raw Material Discounts.

-Full 24/7 Customer Support with a Reliable and Easy-to-Use Chatbot Assistant.

Customer Relationships

Online and In Branch

Online banking meant for facilitating business needs of MSIs.

In Branch banking addressed to develop long term relationship with the MSIs.

Channels

Livin' Merchant application

Bank Mandiri's website and social media platforms

User community

Customer Segments

MSIs in the City of Surakarta, particularly those that have not yet undergone digitalization.

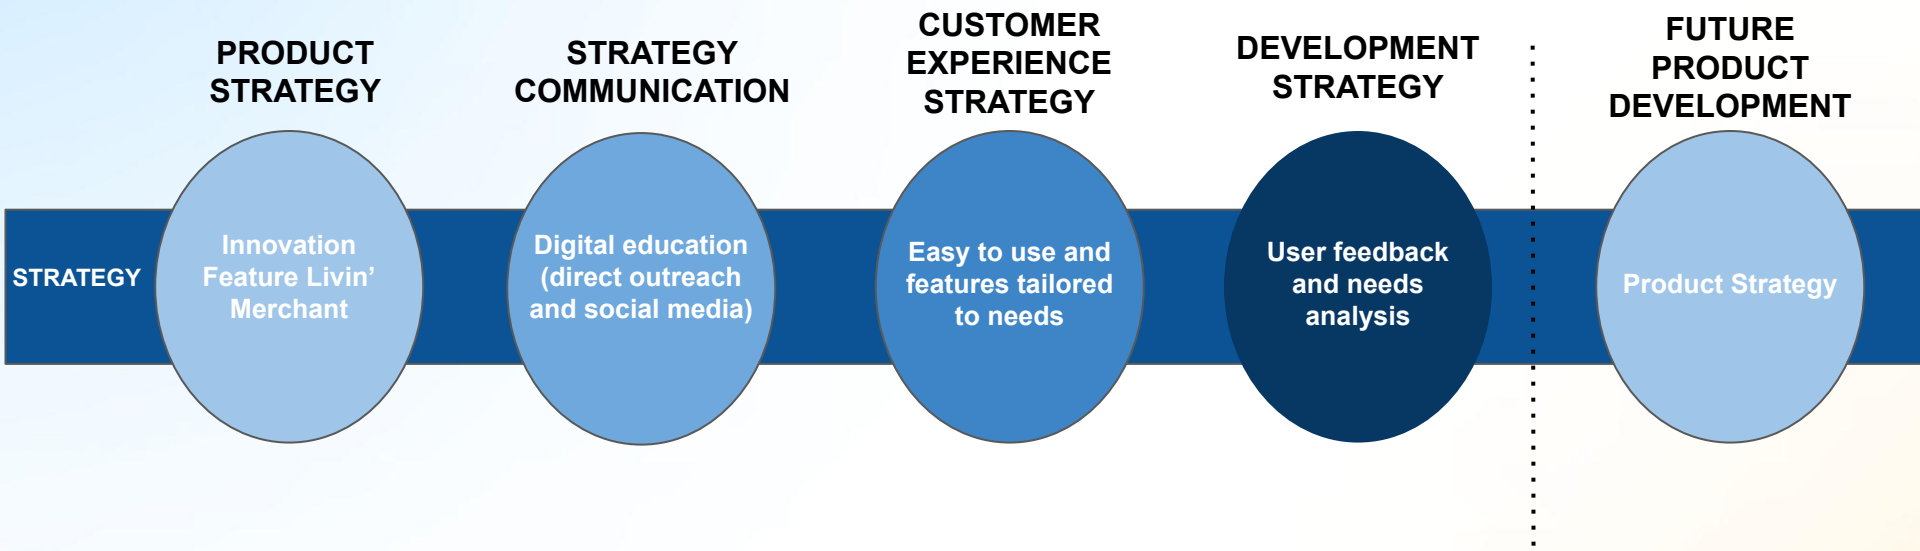
Cost Structure

- Software development and maintenance costs
- New user acquisition costs

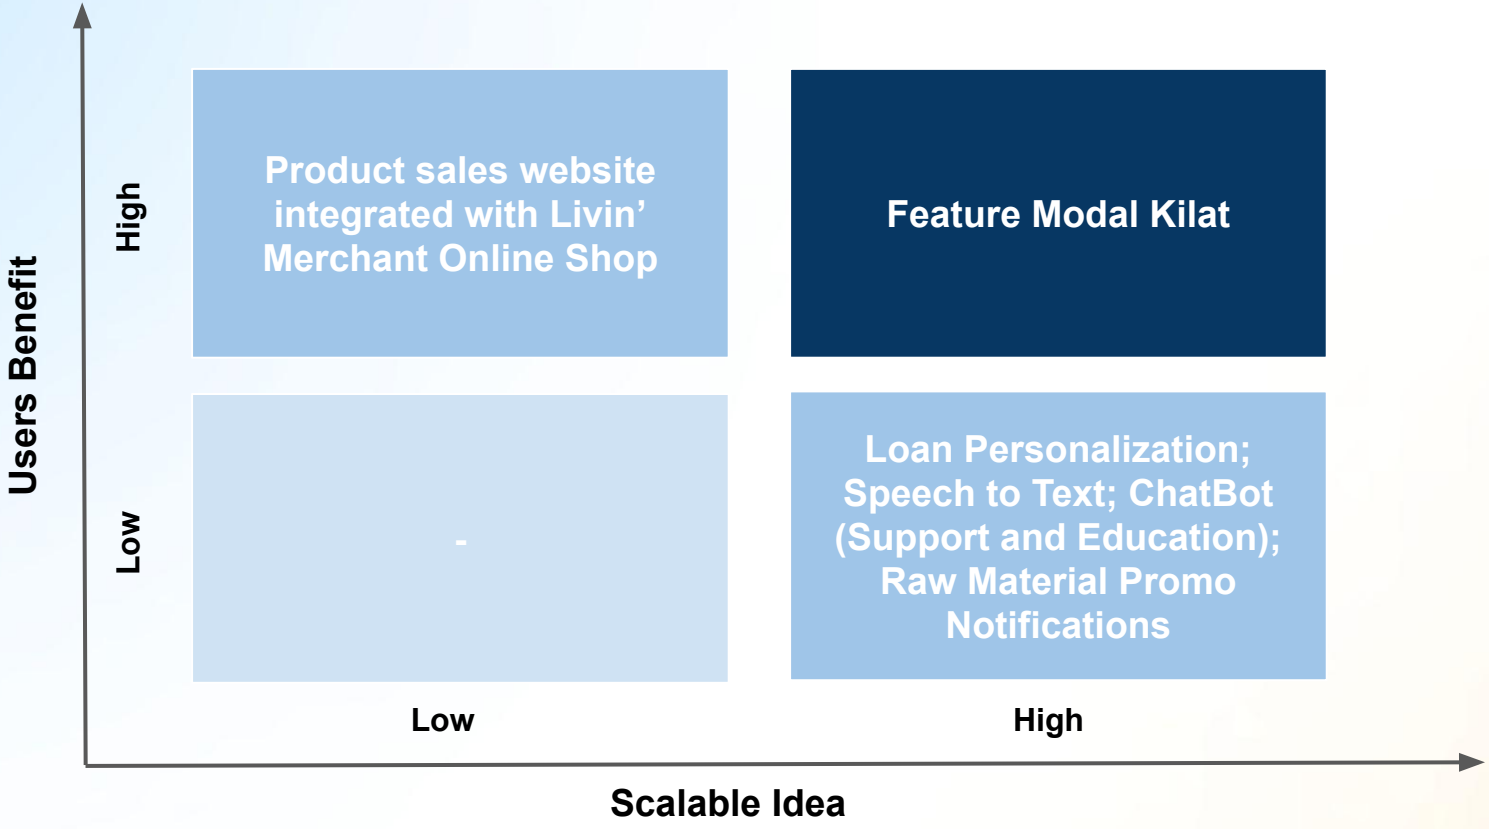
Revenue Streams

- Fee based income from MSI's subscriprion.
- Fee based income from customer - MSI's transaction.
- Interest from MSI's loan financing.

Go To Market (GTM) Strategy



Impact & Scalability



Closing

The majority of MSIs in Surakarta City have not yet been digitalized and face challenges in accessing capital, marketing, and raw material procurement.

Recommendation: Support the innovation of Livin' Merchant features to accelerate the digitalization of MSIs in Surakarta City.

Thank You!

Financial Feasibility & Pricing Strategy

One-Time Development Cost

Component	Estimated Cost	Description
UI/UX Design & Research	Rp25,000,000.00	Full user flow, multi-role design
Mobile & Backend Development	Rp150,000,000.00	Advanced loan features, scalable backend
API Integration & Security	Rp40,000,000.00	OTP, chatbot, eKYC, audit
QA & Penetration Testing	Rp20,000,000.00	UAT + security vulnerability scan
Deployment & Cloud Setup	Rp20,000,000.00	GCP setup, CI/CD pipeline, domain
Advisor Training & Modules	Rp20,000,000.00	Internal SOP, LMS content

Total One-Time Cost: Rp275,000,000.00

Financial Feasibility & Pricing Strategy

Monthly Operational Costs

Component	Cost/Month	Cost/Year	Description
Cloud Hosting & Firebase	Rp7,000,000.00	Rp84,000,000.00	Medium-traffic cloud infra
API, OTP	Rp3,000,000.00	Rp36,000,000.00	Dialogflow, Twilio
Maintenance Developer	Rp5,000,000.00	Rp60,000,000.00	Dev on-call for updates
Digital Marketing	Rp6,000,000.00	Rp72,000,000.00	Social media, awareness
Advisor Field Ops	Rp4,000,000.00	Rp48,000,000.00	Transport, materials

Total Monthly Ops Cost: Rp25,000,000.00

Annual Operational Cost: Rp300,000,000.00

Financial Feasibility & Pricing Strategy

Revenue Model

- Subscription
- Interest Revenue Mode: loan interest (KUR: 6%/year, KUM: 0,99%/month)
- Fee-Based Revenue Model: administration fee (50k - 100k), provision (0,5% -1%)

Pricing Strategy

- Credit allocation between KUR and KUM: 70% KUR (20% Super Micro, 30% Micro, 20% Small) and 30% KUM (20% Micro, 10% Small).

Credit Type	Average Loan Amount
KUR Super Mikro	Rp7 million
KUR Mikro	Rp30 million
KUR Kecil	Rp200 million

Credit Type	Average Loan Amount
KUM Mikro	R25 million
KUM Kecil	Rp100 million

Strategi produk

Problem Statement, Unit Research, Customer Persona (Wicaksana)

Go-To-Market Strategy (1)

PHASE 0 : PRE-LAUNCH (Timeline: Month -2 to -1 Before Launch)

Objective**:** To build a strong foundation, secure partnerships, and prepare all necessary resources before engaging with the first users.

Step 0.1. Finalize Strategic Alliances & Product

Formalize MoUs with key local community organizers (batik associations) and dominant e-commerce platforms, ensuring ready-to-execute partnerships and a fully refined Livin' PekaUsaha module (post-final bug testing & UX refinement). The expected result is ready-to-execute partnerships; fully refined Livin' PekaUsaha module.

Step 0.2. Curated "PengUsaha Pioneers" Selection

Collaborate with community partners to identify 100-150 influential, innovative, and potential vocal advocate Batik and trading MSMEs in Pekalongan. The expected result is curated target list of "PekaUsaha Pioneers" for initial user base

.

Step 0.3. "Digital Enabler" Field Team Setup & Training

Recruit/assign a dedicated team for personalized onboarding. Train them extensively on the product, communication skills, and trust-building for a *door-to-door, white-glove service*. The expected result is competent and motivated field team ready for seamless onboarding.

Step 0.4. Exclusive Offer & Initial Marketing Material Preparation

Detail terms for core offers like the "Founder's Loan Program" (interest-free), subscription fee waivers, and other incentives. Prepare presentation/demo materials for the field team. The expected result is compelling offer package and professional presentation/demo materials.

Go-To-Market Strategy (2)

PHASE 1: INITIAL LAUNCH - “PekaUsaha Pioneers” (Timeline: Month 1 to 3)

Objective: To activate the first group of users, validate the product’s value proposition through direct engagement, and collect valuable feedback for fast iteration.

Step 1.1: Invitation Process & High-Touch Onboarding

A tailored outreach approach is used to engage each selected SME personally. Through direct onboarding sessions, early users are guided through the platform’s key features to ensure a smooth and confident adoption experience.

Step 1.2: Exclusive Launch Event

A dedicated event brings together the initial group of users in a collaborative setting, fostering a sense of pride and belonging. The session introduces advanced platform capabilities and cultivates strong connections between SMEs and Bank Mandiri's digital ecosystem.

Step 1.3: Intensive Monitoring & Feedback Collection

Early usage is closely monitored to identify common pain points and behavioral patterns. Regular feedback channels are established to capture valuable input, which is immediately leveraged to refine the platform and align it with SME needs.

Go-To-Market Strategy (3)

PHASE 2 : LIMITED PUBLIC LAUNCH (Timeline: Month 4 to 6)

Objective**:** To leverage the success of the pilot program to expand the user base within Pekalongan, driven by testimonials and word-of-mouth marketing.

Step 2.1. Produce & Amplify Testimonials

Convert testimonials and success stories from the Pioneers into high-quality marketing content: short videos, inspiring quotes, and simple case studies demonstrating tangible impact (for an example "Thanks to Livin' PekaUsaha, I secured a loan for raw materials 30% faster"). The expected result is A credible library of marketing assets.

Step 2.2. Activate the "Invite a Peer" Referral Program

Officially launch the referral program to the Pioneers, offering clear incentives (for an example a 3-month subscription fee extension) for each new SME they successfully refer who becomes an active user. The expected result is in the form of low-cost, high-trust organic acquisition channel.

Step 2.3. Launch Targeted Local Marketing Campaigns

Begin opening public registration, restricted to the Pekalongan area. Utilize the testimonial assets from Step 8 in geo-targeted social media ad campaigns, place promotional materials at community partner and e-commerce hub locations, and engage local media.The expected result is an increase in new user acquisition beyond the initial Pioneer network, marking the transition from a closed pilot to a limited public launch.

Go-To-Market Strategy (4)

PHASE 3 : NATIONAL EXPANSION STRATEGY(Timeline: Month 7 to 12)

Objective: To expand Livin' PekaUsaha to new regions and scale its impact nationwide, capturing Indonesia's MSME market potential.

Step 3.1. Nationwide Rollout Planning

Design a nationwide expansion roadmap targeting all provinces with significant MSME activity to ensure full coverage across Indonesia.

Step 3.2. National Partnership Network

Establish strategic partnerships with major national e-commerce platforms, government institutions, and MSME associations to enable large-scale user acquisition nationwide.

Step 3.3. Unified AI Personalization for Diverse Region

Develop AI-driven solutions capable of handling diverse regional business patterns while maintaining a unified user experience nationwide.

Step 3.4. Large Scale National Branding Campaign

Execute synchronized nationwide marketing initiatives through social media, mass media, and national events to strengthen brand presence in all regions of Indonesia.

Step 3.5. Centralized Nationwide Data Analytics

Leverage a centralized national data platform to analyze transaction patterns from across Indonesia, providing proactive and personalized financial services tailored for MSMEs in every province.

Chapter 5: Risk Assessment & Mitigation

Risk Assessment & Mitigation

Business Risks	Regulatory Risks	Mitigation Plans
Inaccurate or Low-Value AI Recommendations: The core AI engine may fail to provide genuinely useful, actionable insights. Generic or inaccurate recommendations will erode user trust and cause high churn rates, collapsing the platform's primary value proposition.	**Misleading Financial Advice:** The AI's output could be legally interpreted as formal financial advice, creating liability for the bank if users incur losses. This risks scrutiny from the Financial Services Authority (OJK).	**1. Continuous Feedback & Iteration:** Implement an intensive monitoring to rapidly refine algorithms based on real-world usage. **2. Explicit Disclaimers & Communication:** Clearly state in the UI and Terms of Service that the platform provides AI-generated *suggestions*, not certified financial advice.
Data Privacy & Security Concerns: SMEs may be hesitant to share sensitive financial data (income, expenditure, transaction patterns) required for the AI to function, fearing privacy breaches or data misuse.	**Non-Compliance with Data Protection Laws:** Failure to manage, store, and process user data in accordance with Indonesian data protection laws (UU PDP) and OJK regulations could lead to severe penalties, sanctions, and reputational damage.	**Compliance by Design:** Ensure legal and compliance teams are involved from the start to guarantee all data handling processes are fully compliant with OJK and UU PDP regulations and have Transparent Data Policy.
Service Disruptions from Partners: A data breach, service outage, or compliance failure at a key partner (e-commerce platform) could cripple platform functionality and directly harm user trust in the Livin' PekaUsaha brand.	**Insufficient Third-Party Risk Management:** OJK holds financial institutions fully accountable for the risks posed by their third-party service providers. A compliance or security failure by a partner is viewed as a failure by Bank Mandiri itself.	**1. Rigorous Partner Due Diligence:** Conduct comprehensive operational, security, and compliance due diligence on all potential partners before any technical integration begins. **2. Enforce Contractual Safeguards:** Embed strict data security standards, compliance obligations, and audit rights into all partnership agreements.

Chapter 6: Financial Feasibility & Pricing Strategy

COST STRUCTURE - Livin PekaUsaha

MY DIGITAL ACADEMY

A. Fixed Costs- Per Quarter (3 Months)

Cost Components	Explanation	Cost Estimate (IDR Million)
Software Development	Intuitive UI/UX with Android & iOS apps, web portal, and backend featuring sales dashboard, QRIS, reports, and inventory tools.	800 million
Marketing (Social Media & Door to Door)	Social media advertising, Google Ads, SEM/SEO, and content to reach merchants. Field team costs for education, onboarding, and direct outreach to traditional MSMEs.	1.200 billion (300m/Quarter)
Partnership Incentives (Tokopedia, Shopee, dll)	Fees for cooperation with large e-commerce or fintech platforms for integration or joint offerings	800 million (200m/Quarter)

B. Variable Costs - Efficient Scale Strategy

Cost Components	Explanation	Cost Estimate Per Unit
Transaction Processing Fee (Realization to Third Party)	Fee paid by the bank to the payment gateway or payment network (QRIS Network) for each transaction processed.	0.3% of transaction value
Merchant Acquisition Fee (per merchant onboard)	Fee directly related to the registration of a new merchant, such as registration incentives, document verification fees, or commissions for acquisition agents.	Rp 15,000 / merchant onboard

REVENUE STREAMS - Livin PekaUsaha

Fee-Based Income From SME's Subscription (IDR 25K/Month)

- Offer benefits such as exclusive discounts, concierge services, or VIP features.
- A profitable revenue stream that increases customer retention.
- Recurring Revenue → increases financial stability.
- High retention → users who enjoy exclusive features tend to stick around longer.

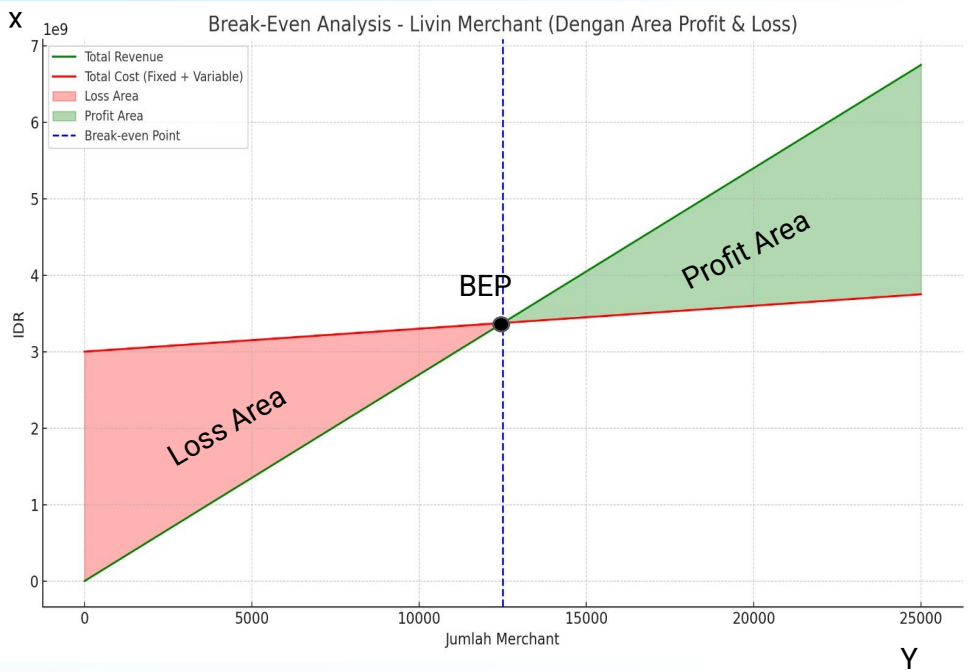
Fee-Based Income From Customer - SME's Transaction/ Admin Fee/ MDR (0.7% MDR)

- Banks earn a percentage of every transaction processed through the app.
- A dynamic & sustainable revenue stream as transaction volume increases.
- The more merchants are active and customers pay digitally, the more revenue accumulates.

Interest From SME's Loan Financing (Interest From Capital Loan)

- This is the main profit driver.
- Loan interest becomes a high-margin revenue source.
- Transaction history is used to accurately assess credit risk, reducing the risk of default.
- This scheme not only increases revenue but also strengthens the merchant ecosystem through access to capital.

Break-even Analysis



Break-even Analysis – Livin PekaUsaha
First Year Assumptions:

- Fixed Cost: Rp 2,800,000,000
- Transaction Value: Rp 60,000 | MDR 0.7%, Processing Fee 0.3%
- Transactions per Merchant: 80/month
- 20% of Merchants subscribe to Premium (IDR 25,000/month)
- Merchant Acquisition Fee: IDR 15.000

Revenue Calculation:

- Transaction Profit: IDR 240 x 80 = IDR 19.200
- Premium Subscription: IDR 5,000
- Gross Total: IDR 24,200 – Acquisition IDR 1,250 = IDR 22,950/month
- Annual Net Revenue per Merchant: IDR 275.400

Break-even Point:

- IDR 2,800,000,000 / IDR 275,400 ≈ 10,167 Active Merchants

Desirability Analysis- Why the market need this

📌 **High Demand for Digital Financial Solutions among SMEs**

- 88% of Indonesian SMEs state they need digitalization to expand their markets and better manage finances. (Source: Katadata Insight Center, 2022)
- In Pekalongan, SMEs in batik and trading sectors struggle with access to capital and financial record-keeping. (Source: Department of Cooperatives & SMEs, Pekalongan Regency, 2023)

📌 **Gap in Competitors' Offerings**

- Conventional banks largely have not adopted AI for tailored financial recommendations to small SMEs.
- E-commerce platforms (Tokopedia, Shopee) focus on transactions but are not integrated with AI-driven financial services. (Source: McKinsey Digital Banking Asia Report, 2023)

📌 **Potential for Loyalty & Community Engagement**

- SMEs tend to remain loyal to platforms that help solve business challenges and offer financing access.
- 65% of SMEs in Central Java are interested in joining business training if integrated into an application. (Source: BPS Central Java, 2022)

Feasibility Analysis - Why this is executable

📌 **Built on Bank Mandiri's Digital Infrastructure**

- Bank Mandiri already has a strong digital network (Livin app, QRIS, and merchant ecosystem), making development faster and less risky.(Source: Bank Mandiri Annual Report, 2023)

📌 **Simple and Practical Features for SMEs**

- The platform focuses on practical tools like invoice tracking, digital payments, financial summaries, and loan applications.
- All features are designed to be easy for SMEs to understand and use.

📌 **User-Friendly and Simple UI/UX**

- The app will have icon-based navigation, minimal text, clear layout, and local language support.
- It is specifically designed for users who are new to digital services.

📌 **Cost-Effective Development and Operations**

- Estimated software development cost is IDR 800 million.
- Marketing and partnership costs are well-planned and affordable. (Source: Internal Financial Feasibility Plan, 2025)

Viability Analysis - Why This is Financially Sustainable

📌 **Sustainable Revenue Streams**

- Subscription fee: IDR 50,000/month per SME
- Admin fee from digital transactions: around 0.3% of transaction value
- Interest from working capital loans: about 12% annually. (Source: OJK UMKM Financing Data, 2023)

📌 **Potential Break-Even by Year 2**

- Target: 5,000 SMEs → around IDR 250 million/month from subscriptions
- The batik and trading sectors in Pekalongan generate around IDR 15 billion/month in digital transactions → potential admin fees of about IDR 45 million/month (Source: Dept. of Industry & Trade, Pekalongan Regency, 2023).

📌 **Scalable and Replicable Model**

- The platform can expand to other cities like Solo or Yogyakarta, which have similar SME profiles.
- Expansion costs remain low because the digital infrastructure is already built.

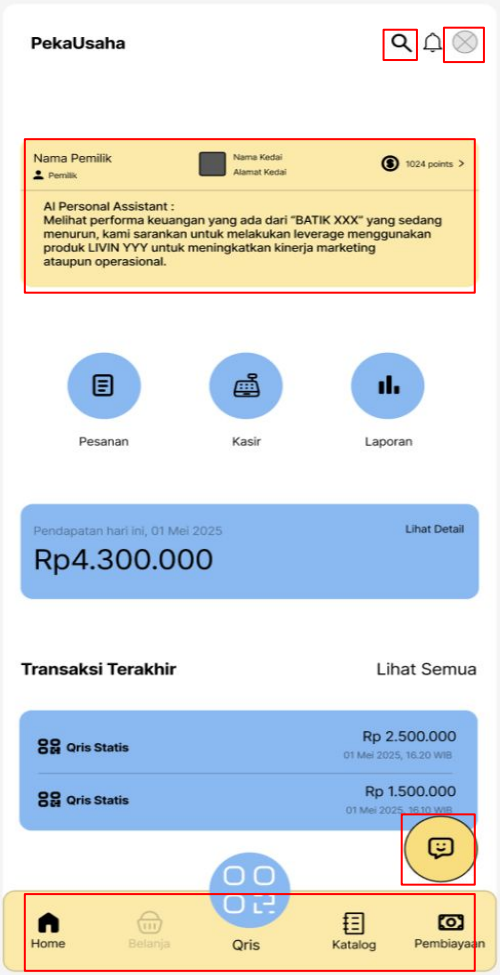
Chapter 7: Prototype - Demonstrating the Solution

Prototype

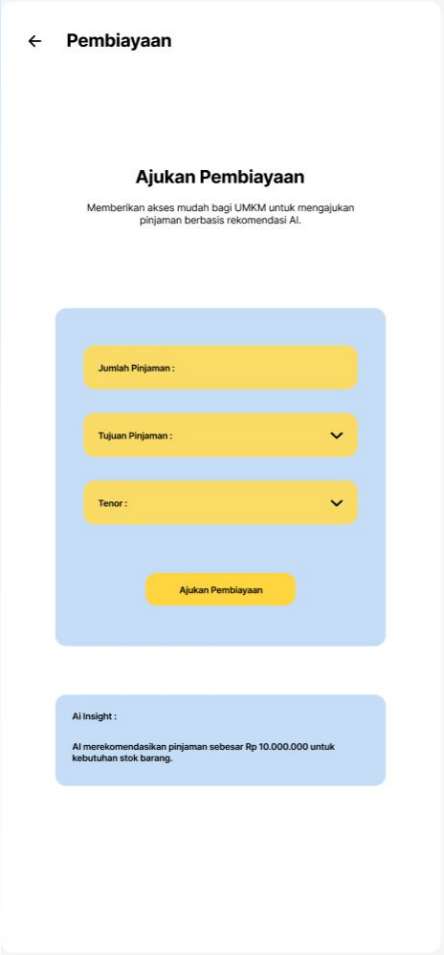
This prototype is built upon the core value propositions, including the **integration of digital banking with e-commerce**, **AI-driven transaction analysis**, **financing recommendations**, an **interactive chatbot**, and a **simplified user interface**. The application design **closely mirrors the look and user experience of Livin' Merchant** to ensure **ease and comfort for SME users**.

Link Figma :
https://www.figma.com/design/HIukgFO2qL00gkYvYe7okY/Bebas?node-id=0-1&t=fskAA3MZF7mM0pYf-1

Prototype - HomePage



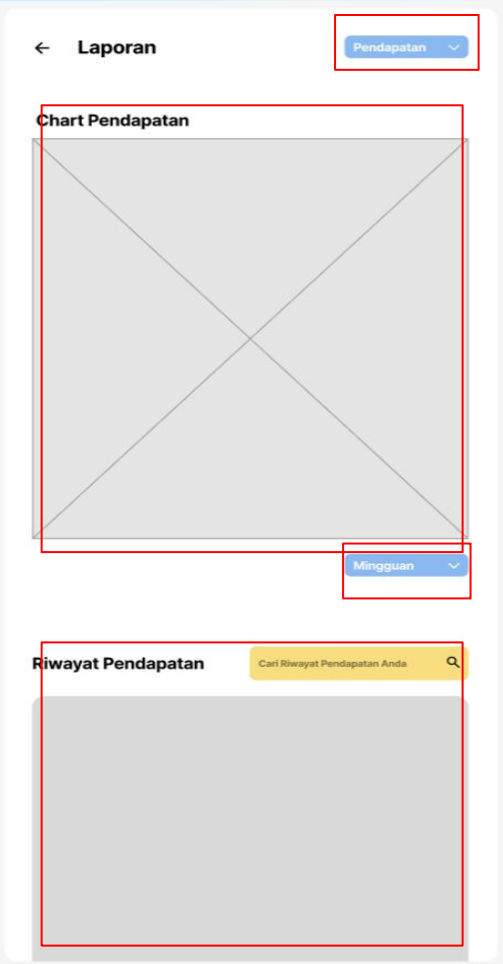
1. **Settings Menu (circular icon, top left):** Provides quick access to user profile settings, account management, and security configurations.
2. **Search Feature (magnifying glass icon):** Enables users to efficiently search for all available app features, especially those not immediately visible on the homepage.
3. **User Info & AI Personal Assistant (central long box):** Displays user and merchant details, accumulated points, and AI-driven insights that offer personalized recommendations to enhance business performance.
4. **Customer Service Chatbot (chat icon):** Offers automated support for common queries, with an option to escalate to Livin Mandiri customer service for more complex issues.
5. **Main Navigation Bar (bottom bar):** Facilitates easy access to core app functionalities, with certain features locked and requiring subscription activation via settings for full access.



Prototype - Financing

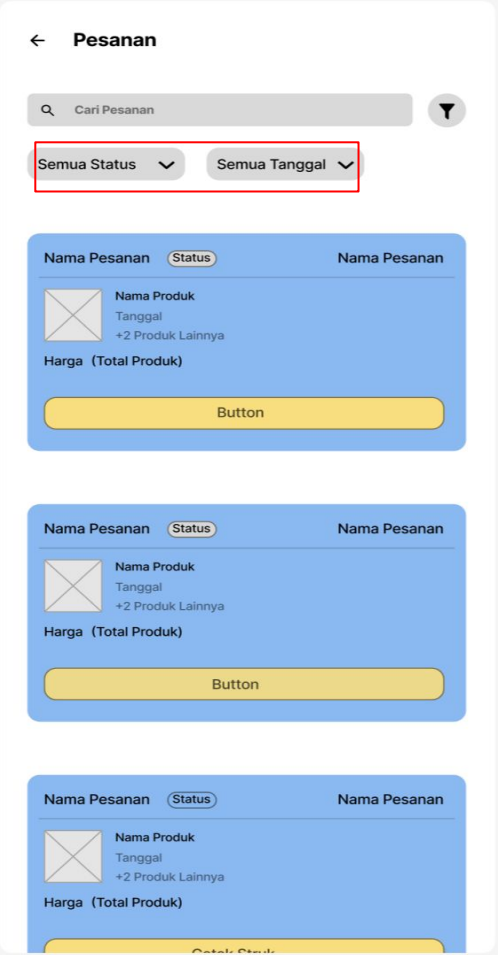
1. It includes three key input sections:
   - **Loan Amount**: Field for entering the requested amount.
   - **Loan Purpose**: Dropdown to select financing needs.
   - **Tenor**: Dropdown for choosing the loan duration.
2. At the bottom, an **AI Insight** section offers tailored loan recommendations based on the SME's business patterns

Prototype - Report

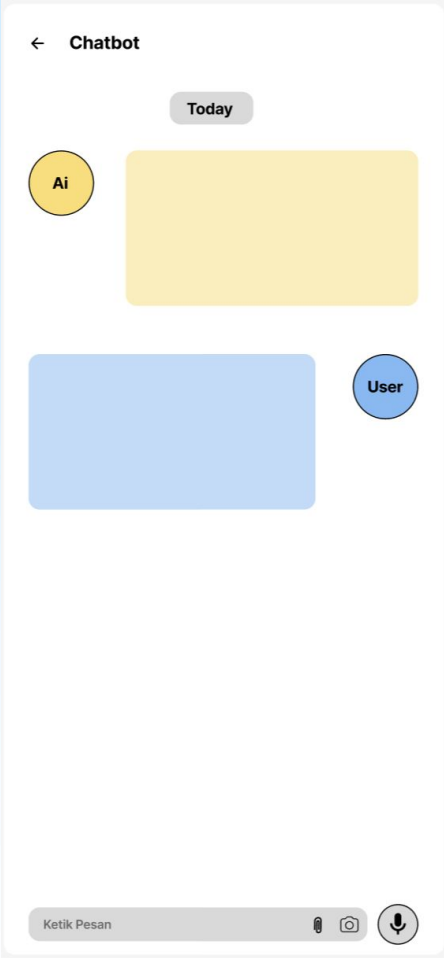


1. **Report Type Selection Button (Top Right):** Allows users to select the type of report to display, such as income, expenses, or other reports.
2. **Dynamic Income Report Chart:** Visualizes income data in a trading-like graph format, helping users quickly identify peaks and troughs in financial performance.
3. **Time Range Selector Button (Bottom Right of Chart):** Controls the time range of data displayed on the chart, with options for daily, weekly, and monthly views.
4. **Income History and Search Feature (Lower Section):** Displays a detailed list of income entries corresponding to the chart data.

Prototype - Order



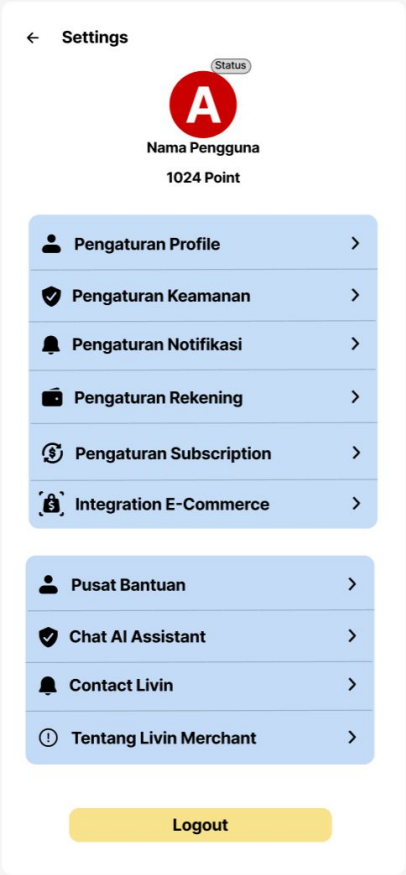
1. **All Status Filter Button**: Located at the top of the page, this button allows users to filter orders by their status, such as "Processing," "Pending," "Completed," and others.
2. **All Date Filter Button**: Positioned next to the status filter, this button lets users select a time range to filter orders based on specific periods, such as daily, weekly, or monthly.



Prototype - Chatbot

1. **Message Input:** At the bottom, there is a text input field with a placeholder "Ketik Pesan" (Type Message) to facilitate easy message or query entry.
2. **Chatbot Functionality:** The chatbot functions as an interactive assistant processing inquiries and delivering real-time responses, enabling users to quickly and efficiently obtain information or solutions to solve common problems.

Prototype - Settings



1. **User Profile**: Displays the user's profile picture along with membership status and the total number of points earned (e.g., 1024 Points), providing concise identity information.
2. **Main Settings Menu**: Includes key configuration options such as: 1. **Profile Settings**: Manage personal data and account information. 2. **Security Settings**: Manage password, two-factor authentication, and other security options. 3. **Notification Settings**: Control the types and frequency of notifications received. 4. **Account Settings**: Manage payment or bank account information. 5. **Subscription Settings**: Manage service subscriptions or app packages. 6.**Integration E-Commerce:** MSMEs can connect their online stores to the platform for automated transaction analysis and financial recommendations.
3. **Additional Services Menu**: Provides supporting services and extra information including: 1. **Help Center**: Quick access to technical help and user guides. 2. **Chat AI Assistant**: Interactive chatbot feature powered by AI for instant support. 4.**Contact Livin**: Customer service contact information. 5. **About Livin Merchant**: Information about the Livin Merchant program.

Final Recommendation

Final Recommendations & Next Steps

How to Develop This Idea?

- **Enhance Ai Engine** : AI-driven personalization for better engagement.
- **Expand e-commerce partnerships.**
- **Introduce loyalty programs** for retention.
- **Involvecommunity and event organizer** to stimulate SME's.

Next Steps

- **Phase 0: Prototype Testing / Pre Launch (2 Months)**
- **Phase 1: Initial Launch (3 Months)**
- **Phase 2: Pekalongan's Rollout (2 Months)**
- **Phase 3: Expansion (6 Months)**

Disclaimer!

1. If you're reading this, congrats—you've successfully made a copy of this template! 🎉
2. Here's where you'll find a bunch of tasks to fill out and work on.
3. Feel free to get creative and change up the structure of this template submission, but make sure you hit all the task points! **And dont limit yourself to this structure and page!**
4. Don't forget to give everyone in the team editing access so you can all work together smoothly. 🤝
5. Save this **as a .pptx** and then go ahead and submit your awesome work!

Oh, and make sure to delete this slide before you submit! 😉

Prototype Section

- **A. Insert a Screenshot:**
  - Take a **clear screenshot** of your prototype (Canva, Figma, Miro).
- **B. Provide a Description:**
  - Explain the prototype's **functionality**.
  - Highlight **key user interactions & service flow**.
  - Show how it aligns with your business model.
- **C. Insert the Prototype Link:**
  - **Ensure the link is accessible!** This allows mentors to review it in real-time.
- 💡 **Takeaway:** Your prototype should focus on **clarity over aesthetics**. Functionality > Design.
- 📌 **Sample Visualization:** A **split slide** with a screenshot on the left and key descriptions on the right.

Insert the Prototype Link (Ensure the link is accessible! This allows mentors to review it in real-time.)

Feel free to get creative and change up the structure of this template submission, but make sure you hit all the task points! And dont limit yourself to this structure and page! 😄 **You can also add more slide if needed :)**

Disclaimer!

This file will be your final pitch deck draft, and it’s your chance to craft a powerful, winning presentation.

Don’t just rely on what’s written here—push yourself to refine and elevate it. Imagine you’re pitching to Bank Mandiri—make it impactful, persuasive, and impossible to ignore.

You’ll revisit this next week to finalize the deck for your final week, so aim high and make it something truly exceptional! 🚀

Tips

- **Focus on Storytelling**: A compelling pitch tells a story. Begin with the problem and end with the solution, but weave your business model and financial feasibility throughout.
- **Data-Backed Insights**: Use data to validate your assumptions.
- **Refine Based on Feedback**: The mock pitch session is invaluable. You can get the feedback from your peers. Use this opportunity to fine-tune your delivery and make sure your key messages are clear.
- **Be Concise and Clear**: Time is often limited in pitch presentations. Ensure your slides are concise, to the point, and easy to understand at a glance.

Go-To-Market Strategy

Key Insight to Explore:

- **Launch Strategy**: How will the solution be introduced to the market? Focus on initial launch tactics (pilot program, early adopters, etc.).

- **Distribution Channels**: Which platforms (e.g., mobile app, online banking) will be used to distribute the solution? How can Bank Mandiri leverage its existing digital channels for this launch?

- **Adoption Strategy**: How will you drive user adoption? Think about incentives, partnerships, or integration with existing services.

- **Scalability & Expansion**: What are the plans for expanding this solution to new markets or segments in the future? How will it evolve to meet the demands of growing customer bases?

Risk Assessment & Mitigation

- **Key Insight to Explore**:
  - **Business Risks**: What are the potential risks related to the market (competition, customer resistance), operational challenges, or financial concerns?
  - **Regulatory Risks**: What are the compliance or regulatory challenges that need to be addressed? Think about data protection laws, financial regulations, etc.
  - **Mitigation Plans**: How will you reduce or eliminate these risks? What steps will be taken to manage them (e.g., partnerships, customer education)?

Feel free to get creative and change up the structure of this template submission, but make sure you hit all the task points! And dont limit yourself to this structure and page! 😄 **You can also add more slide if needed :)**

Final Recommendations & Next Steps

- **Content:**
  - How would you further develop this idea?
  - What are the **next steps** to refine and implement the project?
  - Any **challenges & risks** to consider?
- 💡 **Takeaway:** Demonstrate **forward-thinking** and readiness for real-world execution.
- 📌 **Sample Visualization:** A **timeline-style graphic** showing short-term & long-term actions.

Thank you!
